Email: akshattgupta01@gmail.com
Mobile: +91-7007784058

SKILLS

Languages: C++, Java, JavaScript, HTML5, CSS3
Frontend: React.js, Tailwind CSS, Bootstrap
Backend: Node.js, Express.js, RESTful APIs, JWT
Databases: MySQL, MongoDB
Tools/Platforms: Git, GitHub, Postman, VS Code, Vite
Core Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOP)

PROJECTS

- Hustle Map: Job Application Tracking System** | [GitHub](#) | [Live](#) Dec' 25 – Mar' 26
- Engineered a full-stack job application management platform enabling users to organize hiring pipelines, monitor application progress, and manage structured interview preparation workflows.
 - Developed a Chrome extension enabling the one-click capture of job postings from platforms such as LinkedIn, Indeed, and Glassdoor, reducing the manual data entry effort by 60%.
 - Designed scalable RESTful APIs integrated with JWT-based authentication and MongoDB persistence to support secure CRUD operations and structured job data analytics.
- Tech:** React.js, Vite, Tailwind CSS, Node.js, Express.js, MongoDB, Mongoose, JWT, Axios, Git
- Rupee Roast: AI-Powered Personal Finance Analyzer** | [GitHub](#) | [Live](#) Jan' 25 – Feb' 26
- Built an AI-powered personal finance analytics platform that evaluates spending behavior and generates automated financial recommendations using the Google Gemini API.
 - Implemented intelligent MongoDB hash-based caching and optimized API request workflows, reducing redundant AI calls and significantly improving response latency and cost efficiency.
 - Designed secure JWT-based authentication and interactive analytical dashboards with real-time expense visualization, category breakdowns, and AI-generated financial insights.
- Tech:** React.js, Node.js, Express.js, MongoDB, Tailwind CSS, Recharts, Google Gemini API, JWT
- Routiqo: Intelligent Fleet Dispatch & Route Optimization System** | [GitHub](#) | [Live](#) Mar' 25 – Jun' 25
- Created an intelligent logistics and fleet dispatch platform utilizing Voronoi-based spatial partitioning algorithms for automated delivery-zone allocation and optimized order distribution.
 - Integrated OSRM routing services and nearest-neighbor optimization algorithms to minimize travel distance, improve delivery sequencing, and enhance operational efficiency for last-mile logistics.
 - Built a real-time fleet monitoring dashboard with interactive geospatial visualization, live rider tracking, and dynamic route rendering using Leaflet and React.js.
- Tech:** Laravel, React.js, MongoDB, Tailwind CSS, Leaflet, OSRM, Axios, REST APIs

TRAINING

- Full Stack Web Development (MERN Stack)** | [Certificate](#)
- Completed intensive training in full-stack web development using MongoDB, Express.js, React.js, and Node.js.
 - Built multiple full-stack applications with responsive UI, REST APIs, authentication, and database integration.

CERTIFICATES

Complete Web Development Course Udemy	Feb' 26
Generative AI Infosys	Aug' 25
Data Structures & Algorithms IAMNEO	Dec' 24
The Bits and Bytes of Computer Networking Google	Sep' 24

EDUCATION

Lovely Professional University Bachelor of Technology Computer Science and Engineering: CGPA: 7.5	Phagwara, Punjab Aug' 23 – Present
Lucknow Public School Intermediate PCM Percentage: 72%	Lucknow, UP Apr' 22 – Mar' 23
Sant Atulanand Residential Academy Matriculation Percentage: 92%	Varanasi, UP Mar' 20 – May' 21
